

## WaterMax® Water Softener + Filter - FEATURES

### 1 CONVENIENT BUILT-IN BYPASS

Bypass the water softener whenever you don't need it, like when watering your lawn!

### 2 SMART TOUCH CONTROLLER

Easy-to-use touch screen interface to customize settings for your specific water needs.

### 3 AUDIBLE & VISUAL SALT ALERTS

Built-in salt monitor lets you know exactly when your softener needs more salt.

### 4 EFFICIENT WATER DISTRIBUTION

Baffle and distribution screens distribute water evenly through the tank. The result is no water channeling or wasted media.

### 5 FULLY CUSTOMIZABLE CHAMBERS

Choose from our 2 or 3 compartment design to configure the exact combination of medias that solve your specific water needs.

### 6 SAFETY SHUT-OFF

Protects your system and home against water overflowing from a system failure.

### 7 PROTECTIVE GRID PLATE

Helps shield the air check valve and ensures a consistent brine concentration.

#### THE WATERMAX SIGNATURE SERIES DIFFERENCE

- Built-in salt monitor detects when salt levels are low
- Baffle and distribution screens distribute the water evenly through the tank to prevent water channeling
- Uses up to 80% Less Time
- Uses up to 50% Less Salt
- Uses up to 80% Less Water
- Directional Flow Screens
- Up Flow Brining
- Fine Mesh Resin
- Packed Resin Bed

# WaterMax® Signature Series - CUSTOMIZATION

The unique three-compartment design allows the WaterMax Signature Series to be customized to take care of your unique water problem.

The benefit of the three-compartment design is that it allows you to have a whole-house water treatment solution in one system. Most standard units either soften *or* filter the water, but not both. This means that you would need to install multiple units to take care of your water problem. The WaterMax Signature Series can be tailored to take care of multiple problematic water contaminants such as chlorine, lead, calcium, and magnesium

## TAILORED FOR YOUR SPECIFIC WATER PROBLEMS

Each unit already includes Bacteriastat at the bottom of the tank to help prevent any bacteria growth inside the system. This helps to keep your WaterMax worry-free and clean.

The three compartment designs allow for the use of additional [custom media options](#) to address specific treatment needs.
